

REMARKS

The Examiner proposed that a checking criteria is not supported by the specification. Although Applicant submits that this feature is at least inherently and/or implicitly disclosed in the specification, Applicant has amended the claims to recite a broader feature of judging rather than checking a criteria. For support, see at least page 45, lines 17-23, and page 46, line 15 to page 47, line 5, which describes an operation when an object D, which is an object to be inserted between other objects, overlaps the line/connection AB drawn between object A and object B.

It is respectfully requested that this Preliminary Amendment be entered in the above-referenced application.

If there are any additional fees associated with filing of this Preliminary Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
